ENGINEERING INNOVATION AT THE INTERSECTION OF LAW AND TECHNOLOGY

ENGINEERING LEADER WITH REAL-WORLD DEPTH

Kevin Delmolino is a Senior Engineer at Oxford Strategic Legal Advisors, bringing nearly a decade of experience as a software engineer, systems designer, and hands-on technologist. Before joining OSLA, he served as a Vice President and Lead Software Engineer at JPMorgan Chase, where he architected and delivered large-scale enterprise systems supporting financial operations. His work blends deep technical knowledge with a practical approach to solving complex digital challenges.

SOFTWARE ENGINEER WITH MULTI-DISCIPLINARY FOUNDATIONS

Kevin's engineering skill set is grounded in a strong academic and professional background across software development, computer science, and applied technologies. Kevin began his career at JPMorgan Chase as a Software Engineering Analyst before advancing to Associate Software Engineer, where he developed applications, optimized data flows, and implemented secure, scalable code.

PROBLEM SOLVER, SYSTEM ARCHITECT, CONTINUOUS LEARNER

Across every role, Kevin has been known for designing clean architectures, improving system reliability, and elevating user and team workflows. At Oxford, he brings this technical depth to build internal tools, automate processes, and support data-driven advisory work—approaching each project with curiosity, precision, and a commitment to continuous improvement.
